

Table of Contents

Section	Page
1 Introduction	1-1
1.1 Background	1-1
1.2 Objectives	1-2
1.3 Modeling Software.....	1-2
1.4 Report Organization.....	1-3
2 Study Methodology	2-1
2.1 Work Process	2-1
2.2 Simulation Modeling Software	2-2
2.2.1 Description of Software.....	2-2
2.2.2 Event Files	2-3
2.2.3 Airspace Structure and Separation Rules.....	2-3
2.2.4 Runway and Taxiway Structure.....	2-4
2.2.5 Runway Procedures	2-4
2.3 Definition of Airspace and Airfield Capacity and Delay	2-5
2.4 Factors Affecting Delay on Runways and Airspace	2-6
2.4.1 Weather Conditions	2-7
2.4.2 Runway Layout	2-8
2.4.3 Fleet Mix.....	2-9
2.4.4 Traffic Peaks.....	2-11
3 Existing Delay and Capacity at Bay Area Airports	3-1
3.1 Existing Aircraft Operations and Airline Flight Schedules	3-1
3.1.1 SFO Flight Schedule.....	3-1
3.1.2 OAK Flight Schedule.....	3-1
3.1.3 SJC Flight Schedule.....	3-1
3.2 Existing Runway Layouts and Operating Procedures	3-3
3.2.1 SFO Runway Configuration and Operating Procedures	3-3
3.2.2 OAK Runway Configuration and Operating Procedures.....	3-6
3.2.3 SJC Runway Configuration	3-7

Table of Contents

3.3	Existing Airspace Structure	3-8
3.3.1	West Plan.....	3-8
3.3.2	Southeast Plan.....	3-10
3.4	Simulation Results – Annual Delays 1999	3-10
3.4.1	SFO Delays	3-11
3.4.2	OAK Delays.....	3-12
3.4.3	SJC Delays.....	3-12
3.5	Model Validation	3-13
4	Managing Demand to Accommodate Future Traffic with Existing Runways	4-1
4.1	Practical Limits of Demand Management.....	4-1
4.2	1999 Sensitivity Analysis.....	4-2
4.2.1	Comparison of Operations.....	4-2
4.2.2	Delay.....	4-4
4.3	Year 2010 and 2020 Flight Schedules	4-6
4.3.1	SFO Flight Schedule.....	4-6
4.3.2	OAK Flight Schedule.....	4-8
4.3.3	SJC Flight Schedule.....	4-10
4.4	Base Case Delays in 2010 and 2020	4-12
4.5	Demand Management Cases.....	4-13
4.5.1	Description of Cases	4-13
4.5.2	Comparison of Operations.....	4-14
4.6	New Technology Reduced Separation Case	4-20
5	Adding New Runways to Accommodate Future Traffic	5-1
5.1	San Francisco Runway Options	5-1
5.1.1	Alternative A3	5-1
5.1.2	Alternative F2	5-3
5.1.3	Alternative BXR	5-5

Table of Contents

5.2	OAK Runway Options	5-7
5.2.1	Inboard Runway Alternative.....	5-7
5.2.3	Outboard Runway Alternative	5-8
5.3	SJC Runway Options	5-11
5.4	Combinations of Bay Area Runway Options.....	5-12
5.5	Future Airspace Network and Operating Procedures.....	5-13
5.6	Projected Delays	5-13
5.6.1	Alternative A3 Delays.....	5-13
5.6.2	Alternative F2 Delays	5-13
5.6.3	Alternative BXR Delays	5-14
5.6.4	Oakland Inboard versus Outboard Runway.....	5-14
5.7	Ultimate Runway Capacity	5-23
6	Summary of Results	6-1
6.1	Demand Management Alternatives.....	6-1
6.2	Runway Configuration Alternatives	6-7
7	Appendix	7-1
7.1	FAA Delay Data for 1997 and 1998	7-1

Illustrations and Tables

Figures		Page
2-1	Regional Airport Delay and Capacity Study Process	2-1
2-2	Influence of Aircraft Delay on Airfield Capacity.....	2-6
2-3	Build-up of Queue Length when Demand Exceeds Capacity	2-11
3-1	SFO Hourly Traffic Demand – Mid-week August 1999.....	3-2
3-2	OAK Hourly Traffic Demand – Mid-week August 1999.....	3-2
3-3	SJC Hourly Traffic Demand – Mid-week August 1999.....	3-3
3-4A	Existing SFO Airport Configuration with West Plan VFR Procedures.....	3-4
3-4B	Existing SFO Airport Configuration with West Plan IFR Procedures.....	3-5
3-4C	Existing SFO Airport Configuration with SE Plan IFR Procedures	3-6
3-5	OAK Existing Airport Configuration.....	3-7
3-6	SJC Existing Airport Configuration.....	3-8
3-7	Airspace Diagram-West Plan	3-9
3-8	Airspace Diagram-Southeast Plan.....	3-10
4-1	Comparison of 1999 SFO Operations	4-3
4-2	Comparison of 1999 Oakland Operations.....	4-3
4-3	Comparison of 1999 San Jose Operations.....	4-3
4-4	2010 Unconstrained Forecast–ADPM SFO Operations.....	4-6
4-5	2020 Unconstrained Forecast–ADPM SFO Operations.....	4-7
4-6	2010 Unconstrained Forecast–ADPM OAK Operations	4-8
4-7	2020 Unconstrained Forecast–ADPM OAK Operations	4-9
4-8	2010 Unconstrained Forecast–ADPM SJC Operations	4-10
4-9	2020 Unconstrained Forecast–ADPM SJC Operations	4-11
4-10	Comparison of 2010 SFO Operations	4-15
4-11	Comparison of 2010 OAK Operations.....	4-15
4-12	Comparison of 2010 SJC Operations.....	4-15
4-13	Comparison of 2020 SFO Operations	4-16
4-14	Comparison of 2020 OAK Operations.....	4-16
4-15	Comparison of 2020 SJC Operations.....	4-17
5-1	Alternative A3 West Plan VFR/IFR.....	5-2
5-2	Alternative A3 Southeast Plan IFR	5-2
5-3	Alternative F2 West Plan VFR/IFR	5-3
5-4	Alternative F2 Southeast Plan IFR.....	5-4

5-5	Alternative BXR West Plan VFR/IFR	5-5
5-6	Alternative BXR-Southeast Plan.....	5-6
5-7	OAK Inboard West Plan Alternative.....	5-7
5-8	OAK Inboard Southeast Plan Alternative	5-8
5-9	OAK Outboard West Plan Alternative.....	5-9
5-10	OAK Outboard Southeast Plan Alternative	5-10
5-11	SJC Dual Runway West Plan Alternative	5-11
5-12	SJC Dual Runway Southeast Plan Alternative.....	5-11
6-1	San Francisco Airport–Average Delay by Demand Management Alternative.	6-5
6-2	Oakland Airport–Average Delay by Demand Management Alternative.....	6-5
6-3	San Jose Airport–Average Delay by Demand Management Alternative	6-6
6-4	Bay Area Airports–Average Delay by Demand Management Alternative.....	6-6
6-5	San Francisco Airport–Average Delay by Runway Configuration Alternative	6-11
6-6	Oakland Airport–Average Delay by Runway Configuration Alternative	6-11
6-7	San Jose Airport–Average Delay by Runway Configuration Alternative.....	6-12
6-8	Bay Area Airports–Average Delay by Runway Configuration Alternative	6-12

Tables	Page
2-1 Percentage of Visibility Conditions	2-7
2-2 Runway Separation Standards Using IFR for Parallel Streams	2-9
2-3 Aircraft Categories for Wake Separation	2-10
2-4 Minimum SFO Trailing Aircraft Separations (in nautical miles)	2-10
3-1 SFO Delays-1999	3-11
3-2 OAK Delays-1999	3-12
3-3 SJC Delays-1999	3-13
4-1 Sensitivity S1 1999 Delay	4-5
4-2 Sensitivity S2 1999 Delays.....	4-5
4-3 Delays for the 2010 Base Case + SOIA/PRM at SFO.....	4-12
4-4 Delays for the 2020 Base Case +SOIA/PRM at SFO.....	4-13
4-5 Resulting Delays for 2010 S2 Demand Reduction + SOIA/PRM at SFO	4-17
4-6 Resulting Delays for 2010 S3 Demand Reduction + SOIA/PRM at SFO	4-18
4-7 Resulting Delays for 2020 S2 Demand Reduction + SOIA/PRM at SFO	4-18
4-8 Resulting Delays for 2020 S3 Demand Reduction + SOIA/PRM at SFO	4-19
4-9 Resulting Delays 2010 Delays with Reduced Separation Through New Technology + SOIA/PRM at SFO	4-20
5-1 Runway Combinations Simulated.....	5-12
5-2 Case 2–SFO A3 and OAK Existing–2010 Average Delays.....	5-15
5-3 Case 2–SFO A3 and OAK Existing–2020 Average Delays.....	5-15
5-4 Case 3–SFO A3 and OAK Inboard–2020 Average Delays.....	5-16
5-5 Case 4–SFO A3 and OAK Outboard–2020 Average Delays	5-17
5-6 Case 5–SFO F2 and OAK Existing–2010 Average Delays	5-18
5-7 Case 5–SFO F2 and OAK Existing–2020 Average Delays	5-19
5-8 Case 6–SFO F2 and OAK Inboard–2020 Average Delays	5-20
5-9 Case 7–SFO F2 and OAK Outboard–2020 Average Delays.....	5-20
5-10 Case 8–SFO BXR and OAK Existing–2010 Average Delays	5-21
5-11 Case 8–SFO BXR and OAK Existing–2020 Average Delays	5-21
5-12 Case 9–SFO BXR and OAK Inboard–2020 Average Delays	5-22
5-13 Case 10–SFO BXR and OAK Outboard–2020 Average Delays.....	5-22
5-14 Case 11–SFO BXR and OAK Outboard with Advanced ATC– 2020 Average Delays	5-23

Illustrations and Tables

5-15	Ultimate Airport Capacity	5-24
6-1	Summary of Demand Management Alternatives–Average Delays in Minutes	6-3
6-2	Summary of New Runway Alternatives–Average Delays in Minutes	6-9
7-1	Delays at Bay Area Airports.....	7-2
